SUMMARY

I have developed and implemented processes based on ITIL conceptions aimed at decreasing of complaints inflow and working process automation across teams. I have proven experience in release management and operation process development and coordination.

ACHIEVEMENTS

At My Project, I spearheaded the development of an innovative face recognition attendance system aimed at automating and enhancing the accuracy of attendance tracking. This project addressed several challenges related to manual attendance methods, including errors, time consumption, and inefficiencies.

1. Project Leadership
2. Technology Integration
3. System Architecture
4. Accuracy and Efficiency
5. User Adoption and Training
